DETAILED ACTION

The applicant's amendment filed 4/7/2006 to the Office action has been entered. Claims 12-25, 27, 29, and 31-40 are pending. The newly amend claims 25, 27, 29, 31-38 and newly added claims 39-40 are subjected to further restriction requirement as follows.

1. The applicant is required to elect one combination of probes, which can be at least two probes selected from the group consisting of SEQ ID NOs: 1-19 or its complementary sequence thereof or all of the probes (See MPEP 803.04, example (c)). Only the combination will be searched. Applicant is further required to identify any probes in the combination, which are novel.

2. A telephone call was made to Mr. Peter Ludwig on 6/14/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joyce Tung whose telephone number is (571) 272-0790. The examiner can normally be reached on Monday - Friday, 8:30-5:00.
